

PONOVIMO!

Koji je ovo geometrijski lik?

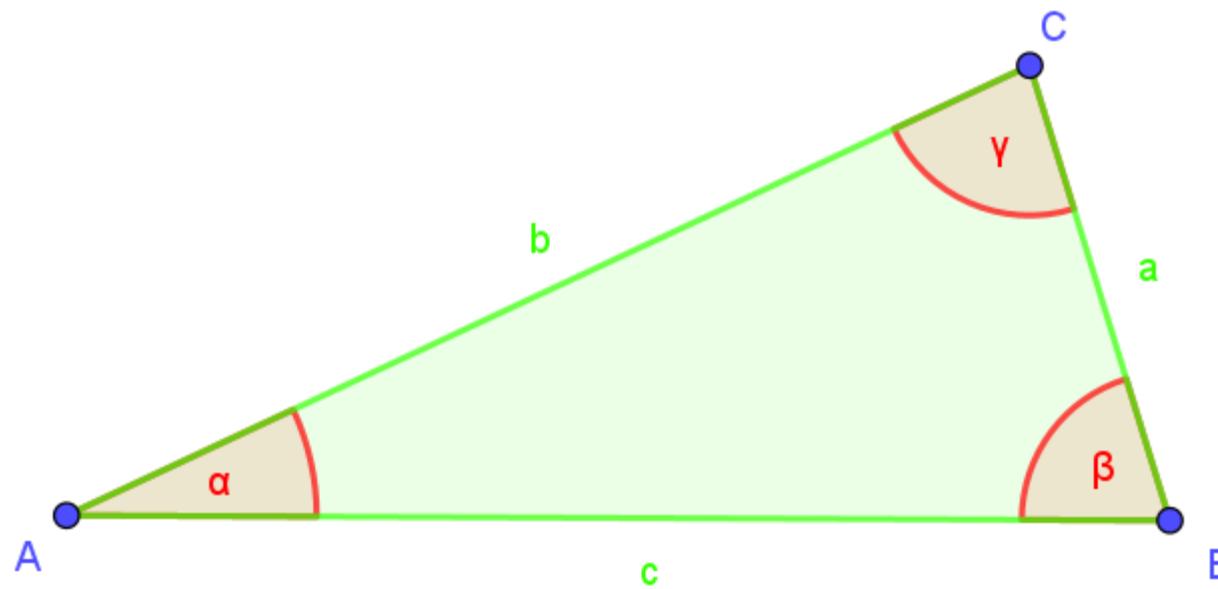

Trokut.

Što označavaju A , B i C u ovom trokutu?

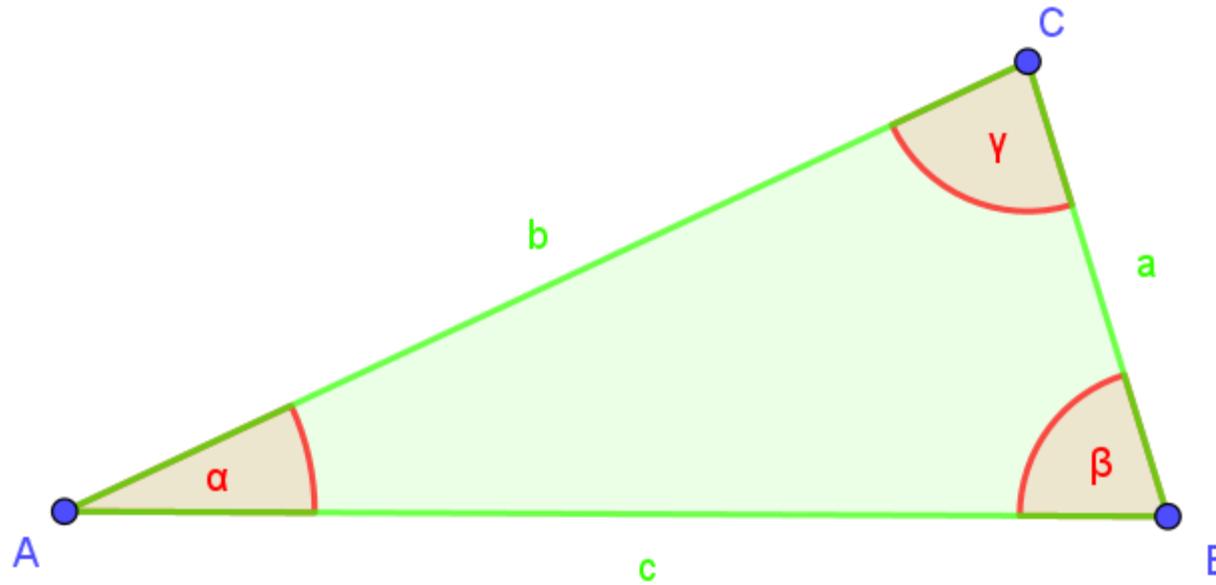

Vrhove trokuta.

Što označavaju a , b i c u ovom trokutu?

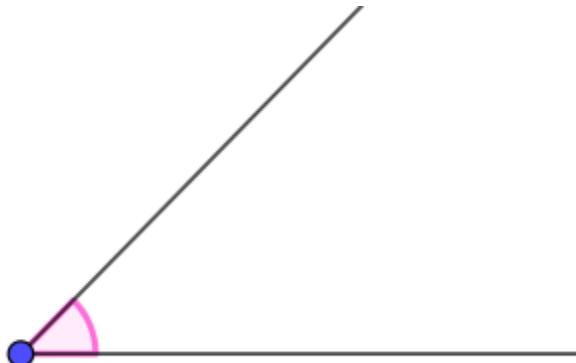

Duljine stranica trokuta.

Što označavaju grčka slova α , β i γ u ovom trokutu?

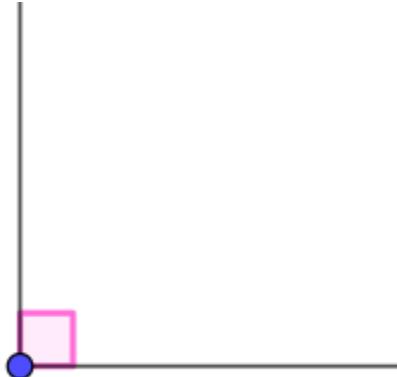

Mjere unutarnjih kutova trokuta.

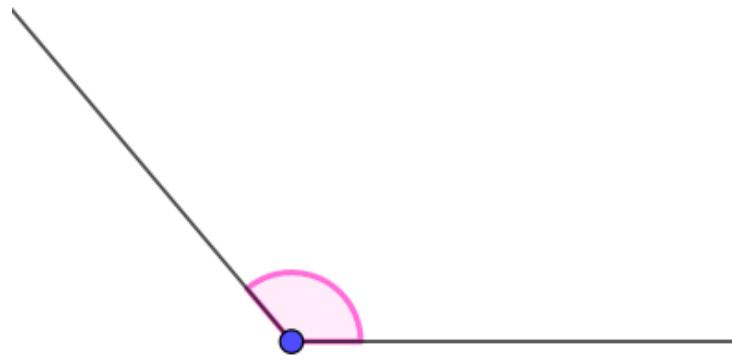

Koje vrste kutova poznajete?

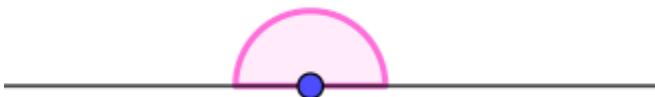

Šiljasti kut

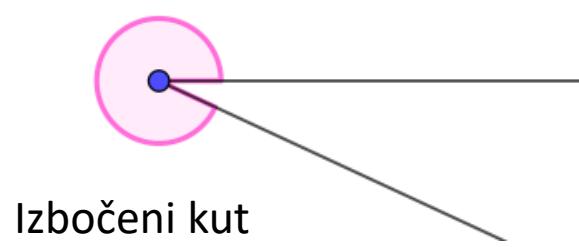

Pravi kut

Tupi kut

Ispruženi kut

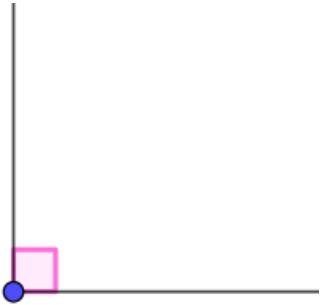

Izbočeni kut

Puni kut

Kolika je mjera...?

a) pravog kuta

$$\alpha = 90^\circ$$

b) ispruženog kuta

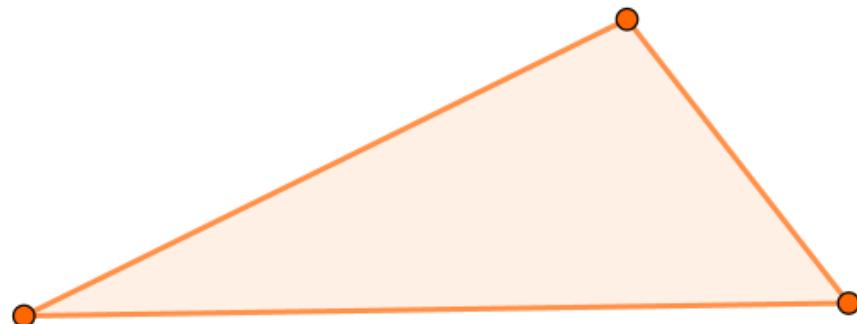

$$\alpha = 180^\circ$$

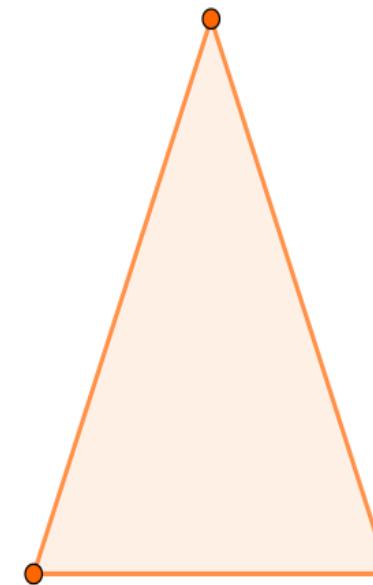

S obzirom na što dijelimo trokute?

- Duljine stranica
- Mjere unutarnjih kutova

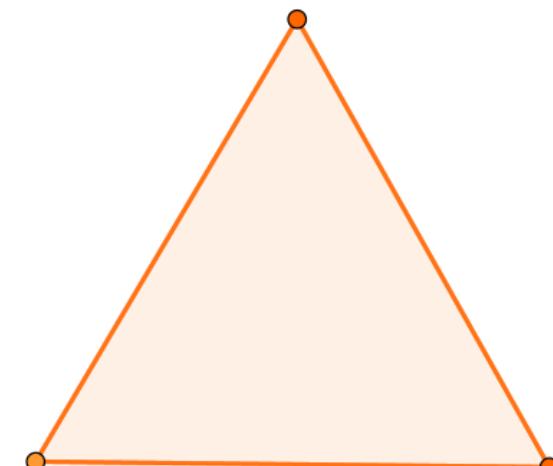

Trokuti s obzirom na duljine stranica

Raznostranični trokut

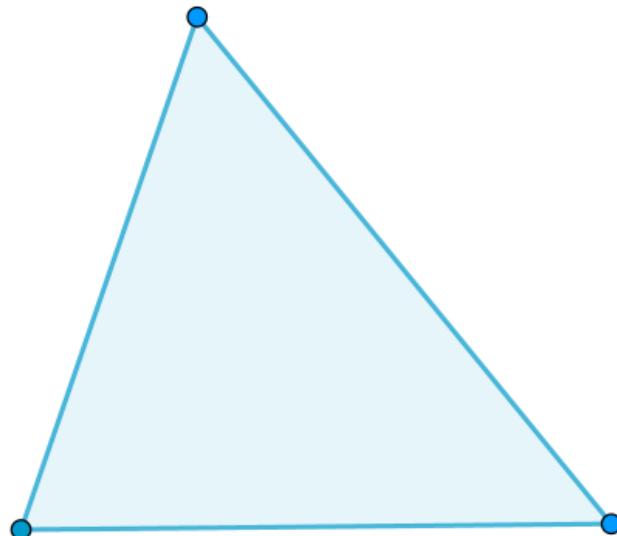

Jednakokračni trokut

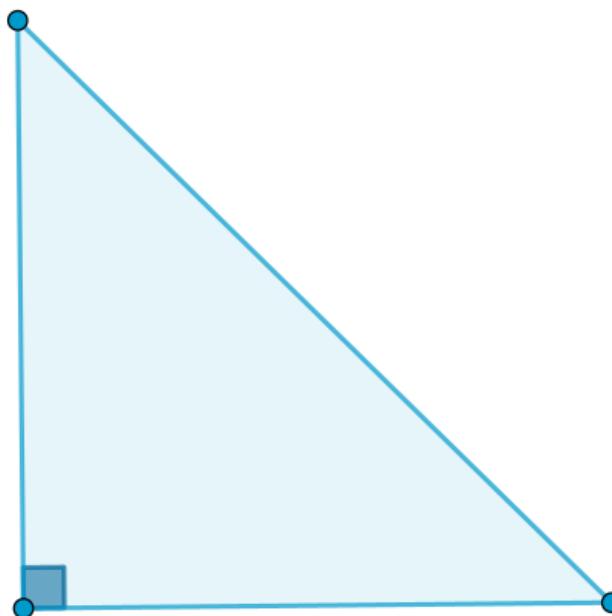

Jednakostranični trokut

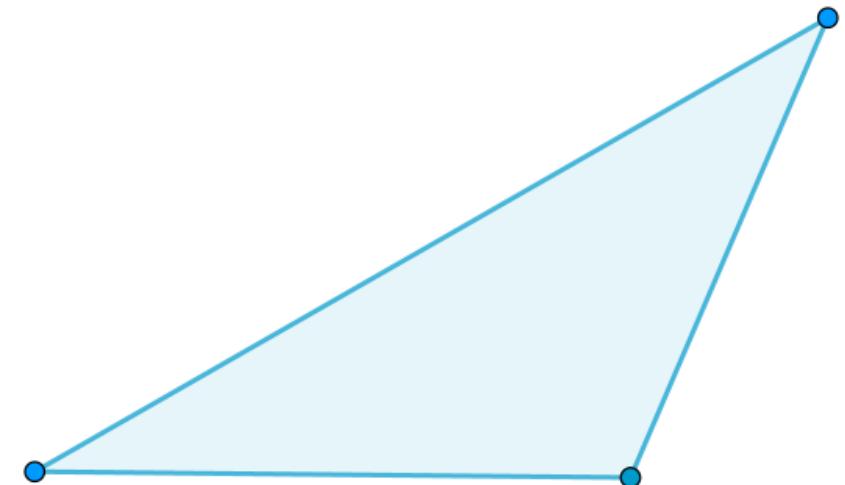

Trokuti s obzirom na mjere unutarnjih kutova

Šiljastokutni trokut

Pravokutni trokut

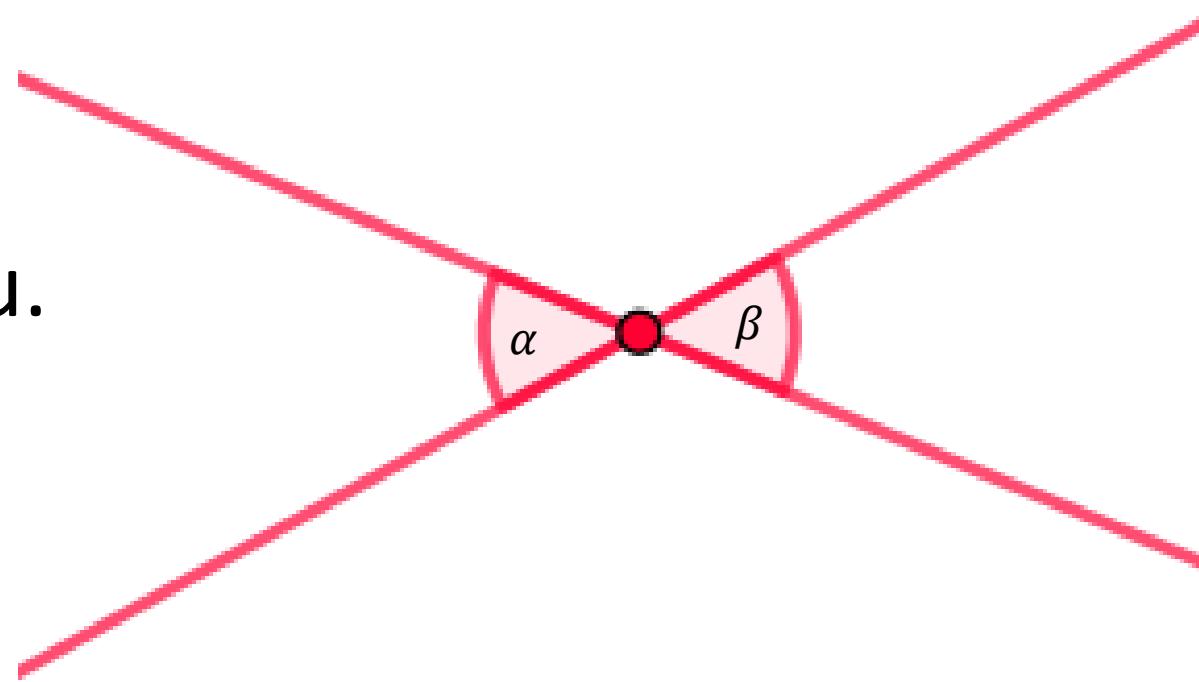

Tupokutni trokut

Prisjetimo se još i....

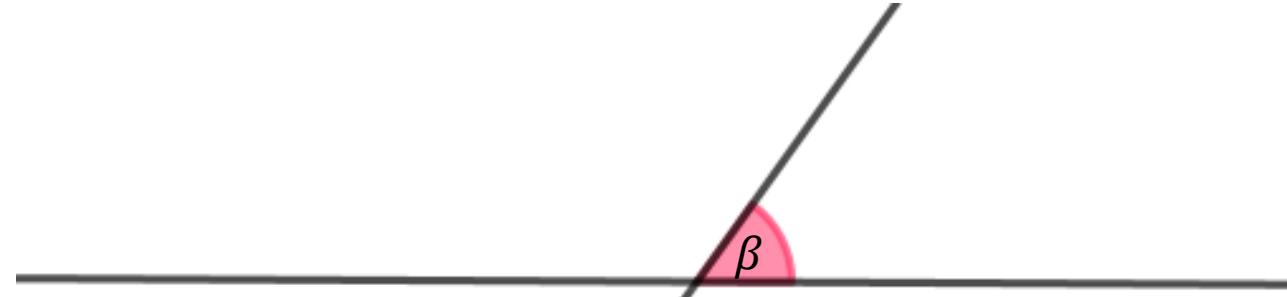

Koliku mjeru imaju vršni kutovi?

Imaju jednaku mjeru.

$$\alpha = \beta$$

Koliku mjeru imaju kutovi uz presječnicu usporednih pravaca?

Imaju jednaku mjeru.

$$\alpha = \beta$$

Primjer 1.

Staklar Mirko

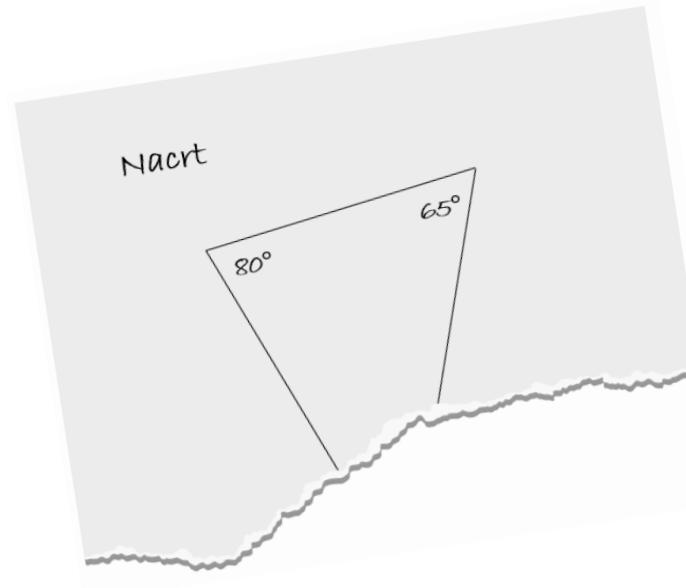

...ima problem

Staklar Mirko dobio je narudžbu napraviti stakleno pokrivalo za stol oblika trokuta.

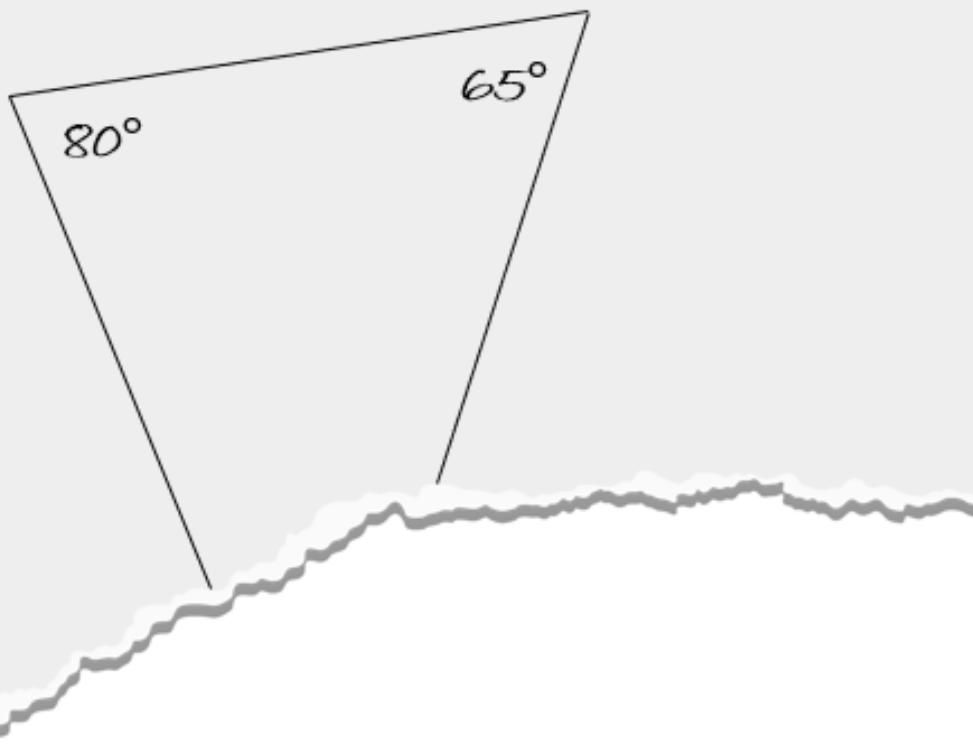

Nacrt koji je sastavio sadržavao je skicu trokuta s točno naznačenim mjerama kutova.

Nažalost, zbog neopreznosti jedan dio papira na kojem se nalazio taj nacrt, otrgnuo se i mjera jednog kuta izgubila se.

Pomozi staklaru Mirku odrediti mjeru izgubljenog kuta kako ne bi kasnio s izradom.

Nacrt

- Što je poznato?

$$\alpha = 80^\circ$$

$$\beta = 65^\circ$$

- Što je nepoznato?

$$\gamma = ?$$

Zbroj mjera unutarnjih
kutova u trokutu

Zbroj mjera unutarnjih kutova u trokutu

ISTRAŽIMO!

Zbroj mjera unutarnjih kutova u trokutu

Izmjerimo i izračunajmo!

<https://www.geogebra.org/m/wyun7rws>

Zbroj mjera unutarnjih kutova u trokutu

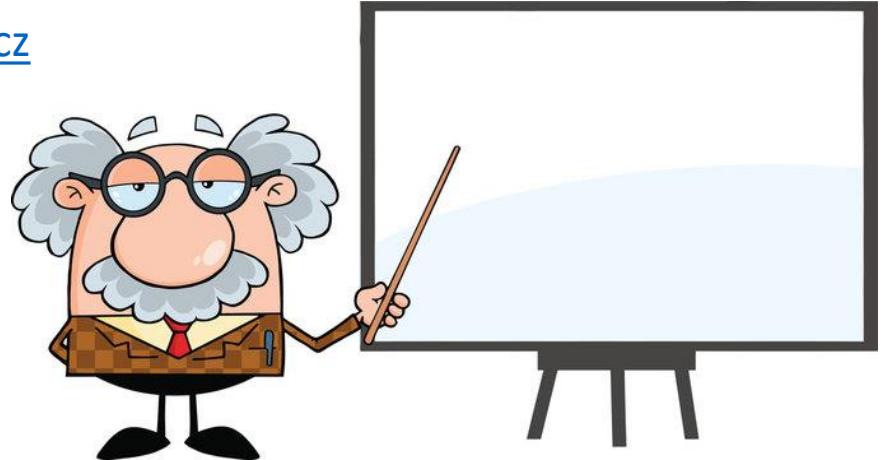

Je li to **uvijek tako**?

Zbroj mjera unutarnjih kutova u trokutu

DOKAŽIMO!

<https://www.geogebra.org/m/bjqtjdcz>

UPAMTI!

Zbroj mjera unutarnjih kutova u trokutu iznosi 180° .

$$\alpha + \beta + \gamma = 180^\circ$$

Vratimo se na naš primjer...

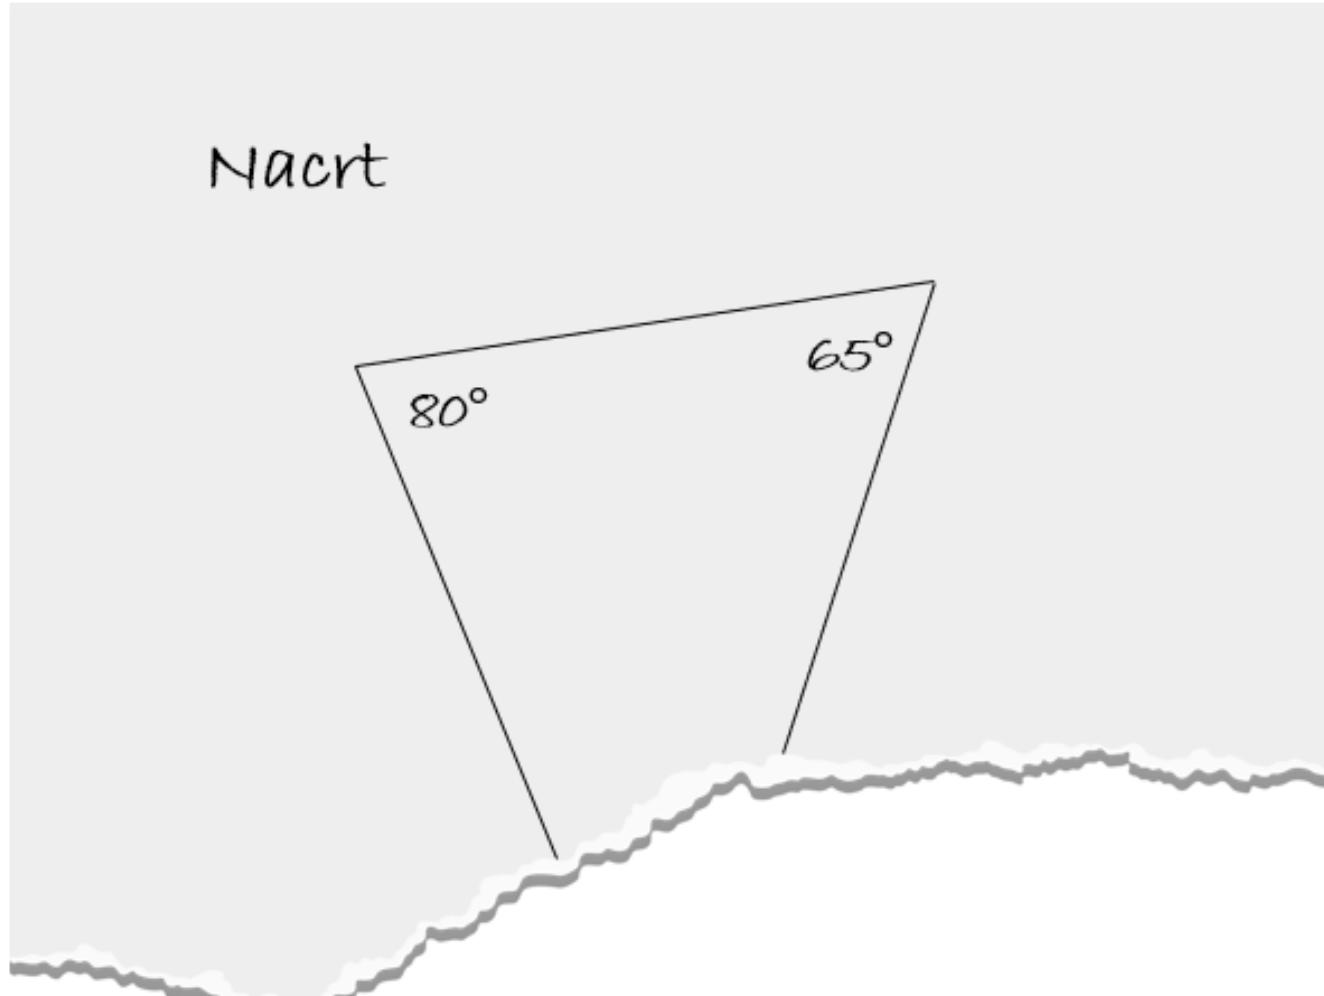

Staklar Mirko

...i dalje ima problem!

Primjer 1.

$$\begin{array}{r} \alpha = 80^\circ \\ \beta = 65^\circ \\ \hline \gamma = ? \end{array}$$

$$\alpha + \beta + \gamma = 180^\circ$$

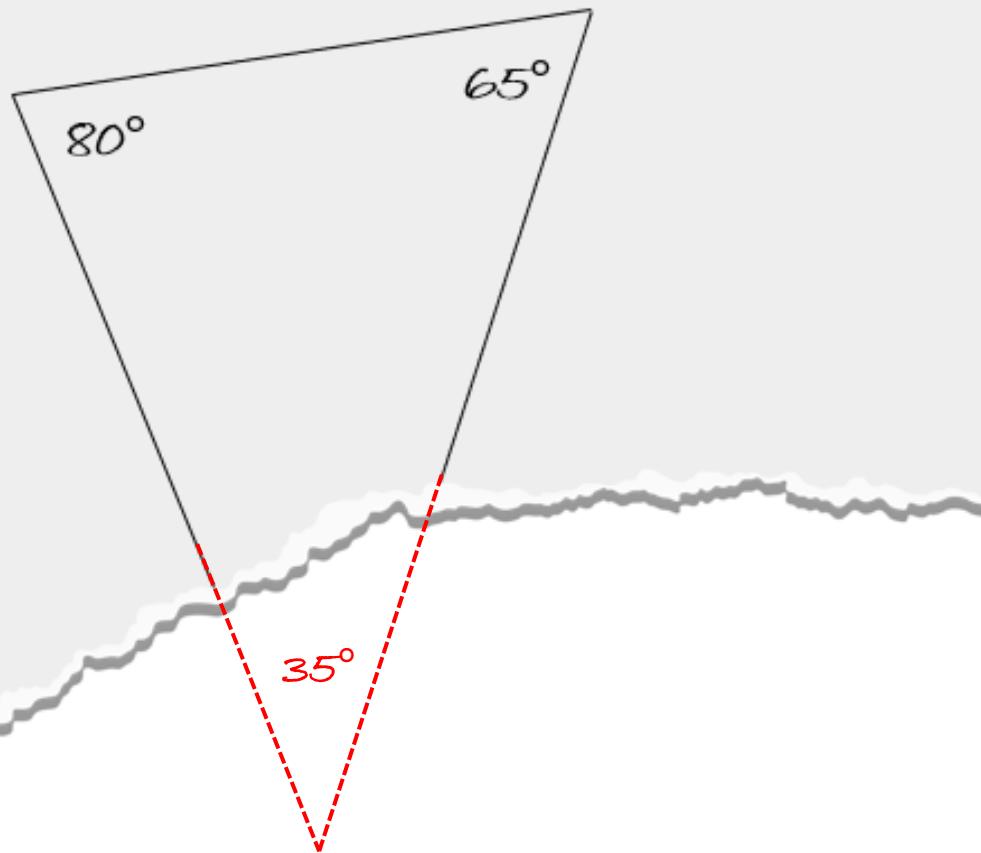

$$\gamma = 180^\circ - (\alpha + \beta)$$

$$\gamma = 180^\circ - (80^\circ + 65^\circ)$$

$$\gamma = 180^\circ - 145^\circ$$

$$\boxed{\gamma = 35^\circ}$$

Nacrt

Staklar Mirko

...više nema problem!

VJEŽBA

Zbroj mjera unutarnjih kutova u trokutu

VJEŽBA

Udžbenik

- str. 175.

Ponovimo!

Što smo danas radili?

Koliko iznosi zbroj mjera unutarnjih kutova u trokutu?

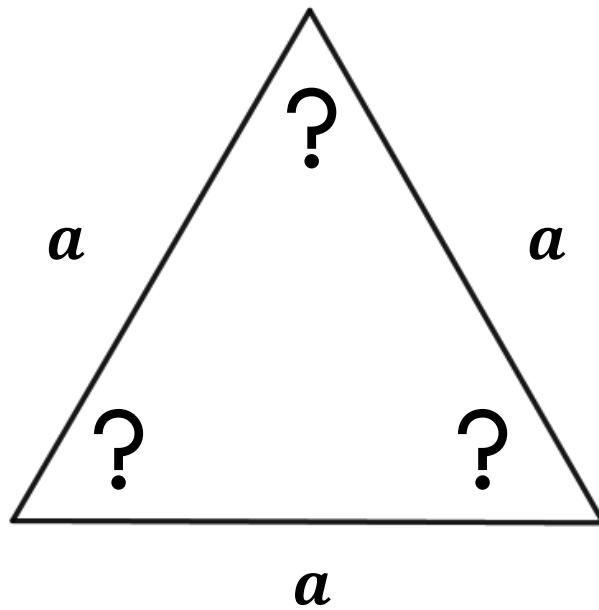

Zbroj mjera unutarnjih kutova u trokutu iznosi 180° .

$$\alpha + \beta + \gamma = 180^\circ$$
